DeFi Traders Are Losing Billions to Invisible Attacks

\$1–3B

lost annually to MEV extraction

*sandwich attacks, frontrunning,
arbitrage bots*

No pre-trade warning

Traders submit blind — no signal of attack risk

Reactive, not preventive

Solutions act after extraction, not before

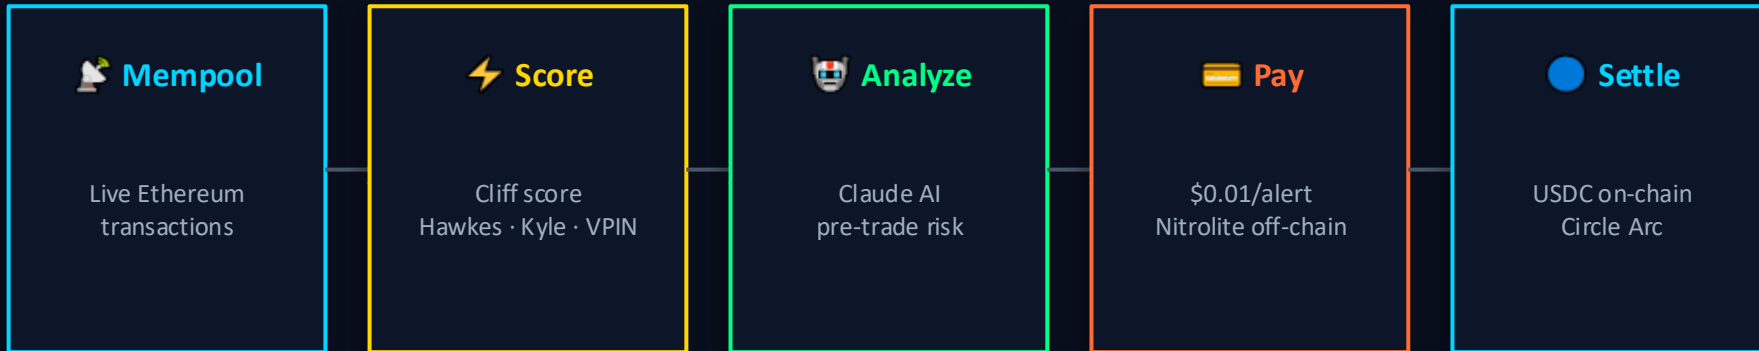

Institutional tools only

Bloomberg-grade microstructure costs \$500+/mo

THE SOLUTION

Pre-Trade Intelligence. Pay Per Query. Settle On-Chain.

KEY INNOVATION

No gas per query. Hundreds of micropayments batch into one on-chain USDC settlement via Nitrolite ERC-7824 state channels — the first autonomous agent payment rail for real-time financial data.

Off-Chain Micropayments. Zero Gas. Cryptographic Truth.

✗ TRADITIONAL

- ✗ Gas fee per transaction
- ✗ \$50–500/month subscription
- ✗ Manual settlement
- ✗ No payment atomicity
- ✗ Centralized billing

VS

✓ NITROLITE

- ✓ Zero gas per query
- ✓ \$0.01/alert — pay as you go
- ✓ Autonomous settlement
- ✓ ECDSA cryptographic proof
- ✓ Circle Arc on-chain finality

A \$50B+ Market With No Dominant Pre-Trade Solution

TAM

Total DeFi Market

\$50B+

DEX trading volume
annually across all chains

SAM

MEV-Exposed Trades

\$12B

Ethereum + L2 swaps
at risk from extraction

SOM

Year 1 Target

\$15M

10K active traders
× \$0.01/query × 150 queries/day

Micropayment-Native. No Subscriptions. Infinite Scale.

Per-Query Pricing

\$0.01 / alert

Pay-as-you-go via Nitrolite channels. Zero commitment, instant access.

API Tier Subscriptions

\$99–499 / mo

High-volume traders get priority scoring, custom thresholds, historical data.

Agent SDK Licensing

\$500–2K / mo

Embed MEV Shield directly in trading bots, DEX aggregators, and wallet apps.

Institutional Data Feed

\$5K–25K / mo

Real-time Hawkes, Kyle's Lambda, VPIN feeds for quant funds and market makers.

Year 1 ARR Target: \$850K – \$1.6M · Year 3: \$12M+ · NRR target: 140%

No One Owns Pre-Trade MEV Intelligence

MEV Shield is the ONLY solution combining pre-trade intelligence + micropayments + AI + autonomous on-chain settlement

From Proof to Protocol to Platform

Q2 2026 · NOW

Payment Proof

- Live ETH mempool scoring
- Nitrolite off-chain ECDSA
- Circle Arc USDC settlement
- Claude AI risk analysis

Q3 2026

Production API

- Multi-chain mempool (Arbitrum, Base)
- SDK for wallets + bots
- WebSocket subscription API
- SpendingLimiter.vy contract

Q4 2026

Ecosystem Layer

- Cross-chain bridge MEV detection
- Institutional data terminal
- DEX aggregator integrations
- VPIN real-time training loop
