Autonomous Micropayment-Gated DeFi Intelligence

Hawkes Process

Kyle's Lambda

VPIN

Nitrolite ERC-7824

Circle Arc · USDC

AI Risk Analysis

AdaBoost AI · vectorblock.io · suvasism@adaboostai.com

THE PROBLEM

DeFi Traders Are Losing Billions to Invisible Attacks

\$1–3B

lost annually to MEV extraction

sandwich attacks · frontrunning · arbitrage bots

No pre-trade warning

Traders submit blind — no signal of attack risk

Reactive, not preventive

Existing solutions act after extraction, not before

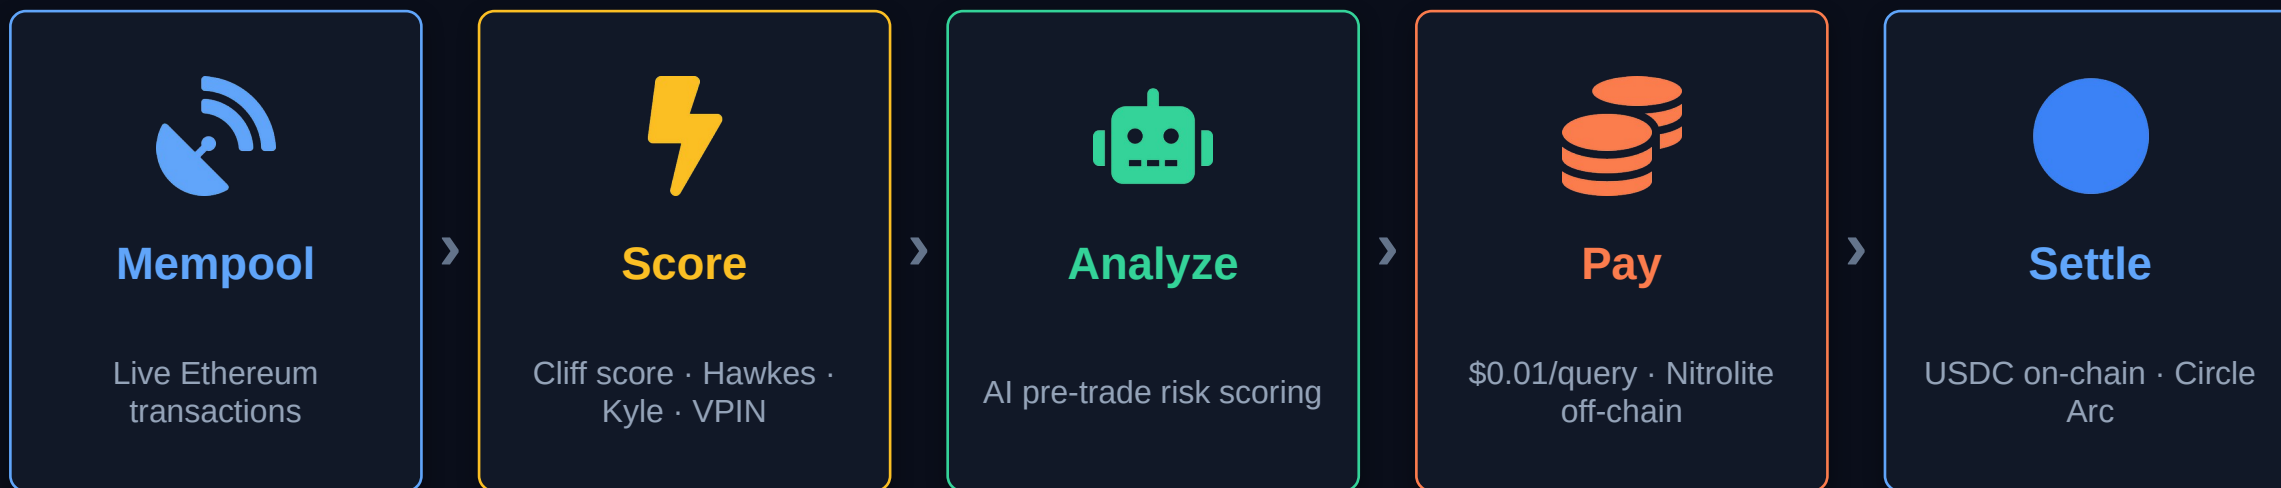

Institutional tools only

Bloomberg-grade microstructure costs \$500+/mo

THE SOLUTION

Pre-Trade Intelligence. Pay Per Query. Settle On-Chain.

KEY INNOVATION

No gas per query. Hundreds of micropayments batch into one on-chain USDC settlement via Nitrolite ERC-7824 state channels — the first autonomous agent payment rail for real-time financial data.

Off-Chain Micropayments. Zero Gas. Cryptographic Truth.

× TRADITIONAL

- × Gas fee per transaction
- × \$50–500/month subscription
- × Manual settlement
- × No payment atomicity
- × Centralized billing

VS

✓ NITROLITE

- ✓ Zero gas per query
- ✓ \$0.01/query — pay as you go
- ✓ Autonomous settlement
- ✓ ECDSA cryptographic proof
- ✓ Circle Arc on-chain finality

LIVE DEMO · REAL TRACTION

Transfer 20 USDC · Status: Success · Block 38,711,093 · Confirmed ≤ 0.5s · Circle developer wallet → 0xa578b...1A65

MARKET OPPORTUNITY

A \$50B+ Market With No Dominant Pre-Trade Solution

TAM

Total DeFi Market

\$50B+

DEX trading volume annually across
all chains

SAM

MEV-Exposed Trades

\$12B

Ethereum + L2 swaps at risk from
extraction

SOM

Year 1 Target

\$15M

10K active traders × \$0.01/query ×
150 queries/day

REVENUE MODEL

Micropayment-Native. No Subscriptions Required. Infinite Scale.

Per-Query Pricing

\$0.01 / query

Pay-as-you-go via Nitrolite channels. Zero commitment, instant access.

API Tier Subscriptions

\$99–499 / mo

High-volume traders get priority scoring, custom thresholds, historical data.

Agent SDK Licensing

\$500–2K / mo

Embed MEV Shield in trading bots, DEX aggregators, and wallet apps.

Institutional Data Feed

\$5K–25K / mo

Real-time Hawkes, Kyle's Lambda, VPIN feeds for quant funds and market makers.

Year 1 ARR Target: \$850K–\$1.6M

· Year 3: \$12M+

· NRR target: 140%

No One Owns Pre-Trade MEV Intelligence

Solution	Pre-Trade	Micro-pay	AI Analysis	Agent-Native	On-Chain Settle
 MEV Shield

EigenPhi					
Blocknative					
MEV Blocker					
Only MEV Shield combines pre-trade intelligence + micropayments + AI + autonomous on-chain settlement					

From Proof to Protocol to Platform

Q2 2026 · NOW

Payment Proof ✓

- Live ETH mempool scoring
- Nitrolite off-chain ECDSA
- Circle Arc USDC settlement
- AI pre-trade risk analysis

Q3 2026

Production API

- Multi-chain (Arbitrum, Base)
- SDK for wallets + bots
- WebSocket subscription API
- SpendingLimiter.vy contract

Q4 2026

Ecosystem Layer

- Cross-chain bridge MEV detection
- Institutional data terminal
- DEX aggregator integrations
- VPIN real-time training loop

THE BLOOMBERG TERMINAL FOR DEFI

Paid by the Drink.

DETECT

Pre-trade MEV before it happens

PAY

\$0.01/query via Nitrolite off-chain
